

# **SCENES-N-NATURE®**

## **MOREL MUSHROOMS NF6247**

### **INSTRUCTIONS**

To install, drill a hole in the habitat with a 3/8" (9.52 mm) drill bit. Apply a generous amount of glue, insert planting pin and hold in place. We recommend using a hot glue gun to secure.

### **Tips and Techniques**

- After installation, sprinkle Soil Base (NF6200-NF6202) around the base of the stem to blend with the habitat and create a freshly "sprouted" look. Secure with Habitat Adhesive™ (NF6099).
- Debris is often found in the wrinkles of a real morel's cap and stem. To add debris, lightly mist the Morel's cap and/or stem with Habitat Adhesive (NF6099) and sprinkle on Soil Base (NF6200-NF6202) or Highlight (NF6208-NF6211). Let dry.
- To adjust coloring, Morel Mushrooms can be airbrushed with matte-finish paint.
